Modules	Detailed Description	EFFORT HOURS REQUIRED				PAYMENT TERMS
		Website Estimation	Project Plan	Mobile Applications		Milestones
				Android App Estimation	iOS App Estimation	
Home Page Design	Website & App	10		10		
Database designs	Database and schema design: - Identifying entities. - Establishing Entity relationships. - Defines database structure. - Defining tables. - Designing conceptual model of the website. - Attributes and Relationships. - Logical Database Design: Once the relationships and dependencies are identified the data can be arranged into logical structures and is mapped into database management system tables. - Normalization is performed to make the relations in appropriate normal forms. - Physical Database Design: It include the specification of data elements, data types, indexing etc. -All these information are stored in the data dictionary	40	Week 1			**Milestone 1**
Web Services	We will be creating the web services for the system will interact with the apps	100				
Firebase Implemention	Here we will implement the Database to sync with Firebase so that the Mobile Applications will update the posts, messages and Notifications data on Real time basis.			25		
Registration Module: Buyer Side	-For users to become legitimate Buyers, they have to register on the website. -There will be a signup from wherein users have to enter their basic details such as, ☐Name ☐User Name ☐Email Id ☐Password ☐Country ☐Captcha ☐Accept the terms and condition of the website. -After filling up the form the user will have to verify its account by clicking a verification link sent to his/her email Id. Note: Registration is optional for the buyers and can purchase a product without registering on the website	8				
Registration Module: Seller Side	-For users to become legitimate Sellers, they have to register on the website. -There will be a signup from wherein sellers will have to enter their basic details such as, ☐Name ☐User Name ☐Store Name ☐Store Address ☐Details about the Store ☐Email Id ☐Password ☐Country ☐Affiliation Partner Code ☐Captcha -Sellers will also have to upload some documents which will be verified from the admin's end -After filling up the form the sellers profile will go to the admin for verification -After successful verification only Seller can log into the system and get access to their personal dashboard and will be able to manage their individual store, manage products and see all product related activities Note: Access of the user will differ depending upon the type of user registered, if buyer they will be able to buy products and if seller they will be able to upload and sell products.	10	Week 2	18	18	**Milestone 2**
Login	-There will be a small form through which users with their authentication details can login to the system. -It also has one feature which allows users to reset a password in case he/she forgets it. This process includes: ☐There will be forgot password button on the screen after clicking which: ☐User are redirected to a page wherein they are required to enter their Email –Id (it has to be the same Id which they have entered at the time of registration) wherein they will receive a reset password link.	5		17	17	
Social Media Login	oThis module allows the user to access the website through their social media accounts like Facebook & G+. oThe system also allows its user to share their purchase with others via. Social media.	12				
Inner Page Design (Website & App)	This will be an ongoing process and we will creating the designs for the pages as and when required	40	This will be an Ongoing process	25		
USER ACCESS LEVEL – BUYER						
Search Product	-There will be multiple categories of products available on the website. -This module will help buyers to find exactly what they are looking for. -It will have the following parameters search: ☐Name ☐Store Name ☐Category of Products. ☐Top Rated -The result of this search will be the product listing. Note: There will be more filters that we will be defining after the detailed discussion regarding the types of products that the sellers will be selling through the website.	20		20	20	

Feature	Description		Timeline			Milestone
Product Listing	-This page contains the listing of all the products with the cover image and price. -This section will display the multiple products per page. -Scrolling down will load more product that matches the client requirement. -Clicking on an image of the product, buyer will be redirected to in individual page and can view the product details -There will be various filter options for users to narrow down their search of products. -The user can apply the following filters: ☐Price, there will be three ranges: •Lowest •Highest •All ☐Seller Category ☐Reviews •Lowest •Highest •All	15	Week 3	15	15	**Milestone 3**
Individual Product Page	-This page will consist of the detailed information regarding the product such as: ☐Product Title ☐Product Images ☐Pricing ☐Description ☐Designer/Seller name ☐Seller Category ☐Shipping ☐Returns Policy ☐Product Reviews ☐Total product review rating ☐Latest reviews ☐About the Seller ☐Other products by the seller ☐Recommended products based on similar seller category ☐Recommended products based on similar product type -From here, user can add the product to cart for purchase. Note: Buyers will be suggested with the related products depending upon the product selected from particular Seller.	12		12	12	
Add to Cart	-All the products that user wishes to buy can be stored in the cart; it is similar to shopping bag wherein we put all our products before purchasing. -After storing products in the cart user can directly proceed for check out. -It is manageable in the sense that the users can easily remove and add more products to the cart. -The product will be always available on the cart till the users either remove it or purchase it. -The client can also enter its zip code to check the shipping charges. -The client can also apply its coupon codes to get some discount. Note: The products selected by the buyer could be from one store or multiple shops. The stores name will be displayed against each product	15	Week 4	15	15	**Milestone 4**
Checkout and Currency Conversion	-This process takes the customer to the payment merchant wherein he/she can pay for its purchase -At this point the buyer will have the capability to choose their currency in which they would like to pay on the website. By default, price would be in NIARA and based upon the currency selection of the buyer the system will convert the Nigerian currency into the chosen currency of the buyer -The checkout will take the following inputs from the customer: ☐Delivery Area (On the basis of the same the delivery partners will be listed alongside the shipping cost for the same) ☐Select Delivery Partner ☐Enter the card details	20		20	20	
Address Management	-At time of placing order, the user can choose the delivery address if the addresses saved previously. -The user can add the new address (The steps of adding new address is similar as given in checkout process) -The user can edit or delete the saved address.	12	Week 5 (provided we have got the necessary documentation. The payment implementation can go upto 1 month ot more based on the documentation provided. This will be done in parallel with other modules implementation)	12	12	**Milestone 5**
Payment System (Nigerian Payment Gateway will be integrated)	-This module will allow customers to make online payment for their purchase. -The payment will be divided among Seller and Admin (Commission). -To make the online payment secure and safe we will be integrating 3rd party service -This will assure the security of the transaction and will allow the users to initiate the transaction without hesitation. -The Payment gateway will provide the following feasibility: ☐Allows customer to make payment online. ☐Secure transaction processing	25		25	25	
Related Product	-Buyers will be suggested with the some of the similar products as per the purchased/viewed products from that specific seller or specific category of products that they have viewed. -The suggested product can differ either depending upon ☐Product Purchased ☐Seller	8		8	8	
Rating and Review Module	-Based on the product quality and other features, the customer will be able to do the following thing under the rating and review section: •Able to give rating to the product with the help of stars. •1 to 5 stars will be available for the rating. •Able to give review i.e. with the help of textbox.	8	Week 6	8	8	
Wish-list	-The products that the user is interested in but not willing to buy at the moment can move the product to wish list. -The user will receive updates regarding the product in wish list. -To buy the product the user can again move that product to cart. Note: To avail the wish list feature, user is required to register on the website.	6		6	6	

Feature	Description					
Gift Card	-The buyers will have the capability to purchase the gift cards through the site and send it to their loved ones by email -Now, in order to porches the gift card the buyer will first have to purchase the gift card by specifying a particular amount and then provide an email id wherein that card has to be sent -The other user who will receive the gift card will have the capability to enter the gift card code on their next order purchase and the amount of the gift card will be automatically discounted from the total cart price	15		15	15	
Live Support (3rd Party Integration)	-The buyers may have some issues and would like to discuss the same with the champion mall admin, there will be a live chat feature that will allow the buyers to communicate with the champion mall support staff	12		12	12	
Contact Sellers	-The buyers will have an option to contact the sellers through the platform wherein they will have to enter the order ID and based upon the same the seller will be displayed and the customer can choose the seller and send message to them -Also, the customer will receive a message in response to the same from the seller's end through the system only -All these messages can be tracked from the admin's end as well	8		8	8	
My Account	-After logging in to the system the customer will enter to its dashboard. -Through the dashboard the customer can do the following things: ☐See the purchase history ☐See the current order status ☐Change the password ☐Change Email	15	Week 7	15	15	**Milestone 6**
Notification System	-This is one of the most important functionality of the System i.e. it will give an alert to the users for every activity performed on the System that is related to them. -The notifications will be system generated and will be sent to the desired user. -User will receive notifications such as: ☐Successful Registration (over email only) ☐Password Recovery Emails ☐Payment done successfully ☐Product purchased. ☐Product arriving ☐Product delivered ☐New Coupon Code / Promo code Available ☐Wish list product is in stock now. ☐Newsletter	15		15	15	
Buyer Dashboard	-User will get access to their personal account after they register/login on website. -Through the dashboard, the User can do the following things: ☐Ordered history ☐Cart ☐Wish list ☐Notifications ☐Able to view new promo code ☐Help Center i.e. The customer will be able to communicate admin regarding issues ☐User will also be able to manage their personal account via this section. The user will do the following things: •Able to manage the profile picture •Able to change the contact number •Able to change the email id •Able to change the name •Able to deactivate account. •Able to add/edit/delete delivery address •Track order status •Etc.	20		20	20	
Asking Admin to Placing Orders	-There will be some customers that want a specific product to be delivered to their location but can see that the seller does not sell product to their location (to be specific to their country) -So in this case, the customers will contact the admin and will let him/her know about the same and the admin will place an order on behalf of such customers -In this case the admin will pay the sellers and will take the responsibility to ship the product from the seller to the customer's international address -Buyers will pay the admin off the website	8	Week 8	8	8	
	USER ACCESS LEVEL – SELLER					
Product Management	-The seller will choose the category and sub-category first before adding the new product. -At the time of adding new product, the seller will have to do the following things: ☐Able to manage the Name of the product i.e. add and edit the name of product. ☐Able to manage i.e. add/edit/delete product images ☐Able to manage the count of the product ☐Manage the price of the product i.e. Add/edit/delete the price ☐Manage the description of the product i.e. Add/edit/delete the description -The seller will have the capability to manage the products i.e. able to add, edit, or delete the products at any time.	20				**Milestone 7**
Inventory Management System	-With the help of inventory management system, the seller can do the following things: ☐Able to manage the availability of the product i.e. In stock / Out of Stock. ☐Able to set and manage the minimum count of the product for the notification. (Let say The seller will set the minimum count as 10 Product, once the count reaches 10 or less than 10 products, at that time the system will send the notification that" Less products remaining, please add the products". ☐Able to add, edit, or null the count of the product as per the demand of the product.	15				

Module	Description	Hours	Timeline			Milestone
Bulk Upload System	-Through the use of bulk upload system, the seller will be able to add the products in bulk rather than adding one by one products on the website. -The seller can import as well as export the .CSV file in the website which contains the various details of the products like: ☐Name of the product ☐Category of the product ☐Description ☐Price -Through this, the images of the product will not be able to upload, the admin will have to upload the images one by one on the system.	15	Week 9			
Seller Profile	- Seller will have an option to manage their personal profile from its dashboard - Buyers will be able to view individual seller profile with following details: ☐ Total Product Posted ☐ Total Reviews ☐ Seller Contact Details - Seller profile will be public and any user can view the same (Assumption).	12				
Order Management System	- The seller will be able to manage and view the order and able to view the following things: ☐ Product name ☐ Product code ☐ Cost of the product ☐ Buyer Name ☐ Contact of buyer ☐ Shipping Address of buyer ☐ Etc.	12				
My Reviews	-Through this the seller will be able to view all the reviews posted by the buyers. -The sellers can also reply to the buyer through this page.	10	Week 10			
Payment Management	-The seller will be able to see all the payments that have been carried out for their product sales -The sellers will be able to see the payments that they will be receiving from the admins end -The payment between the seller and the admin will be carried out off the website and will be settled on a weekly basis	15				
Respond to Customers and Admin	-As seen in the buyer's section, the customers can send complaint messages to the sellers -Through this section, the sellers will have an options to respond bac to the customer's messages -For every message received, the sellers will get notification -Similarly, the seller can respond back to the admin as well	10				**Milestone 8**
Seller Dashboard	- Seller will have access to their personal dashboard from where they will be able to manage their individual - After logging in to the system the seller will enter to its dashboard. - Through the dashboard the seller can do the following things: ☐ New Orders ☐ Products Added ☐ Add/Edit/Delete Products ☐ Sales Report on Each Product ☐ Comments, Reviews on a Product ☐ Manage Profile Note: 1. The sellers will be charged a Flat Fee Plus or percentage of total sales or Both as platform charges. (This will be set by the admin) 2. The sellers would be classified as individual seller or a professional seller based on the number of goods they have sold. Say admin has set the limit as 15 products sell and an individual seller sells more than 15 products on the platform then the seller becomes a professional seller 3. Now, once the seller becomes a professional seller the charges for the platform usage will be different and will be implied with the charges set for the professional sellers by the admin	20	Week 11, Week 12			
Frontend Development	This Phase includes the HTML Development of Home Page Design and Inner Pages Designs	30				
Frontend Integration into Backend	This section includes the Integration of HTML Pages into Backend	20				
Testing and Bug Fixing	This Module Includes the Testing and Bug Fixing the above Modules before the HTML Integration					
USER ACCESS LEVEL – AFFILIATE MEMBER						
Note :The affiliation partners are the ones who will be responsible for encouraging the local sellers to list their stores on the champion mall website						
Become an Affiliate	-Any general user on the website will have the option to become an affiliate member -They will just have to fill up a generalized form which will be submitted to the admin -Members will also have to upload some documents which will be verified from the admin's end -Admin will review the information shared and then will decide whether to allow the user to become an affiliated member -Upon approval, the affiliate member will receive a unique code -This unique code has to be entered by the seller who are registering on the website with reference of a specified affiliation member	10				
Check Stats	-The affiliate member will be able to check out their stats with reference to ☐Number of Stores under the member's affiliation ☐Total Sales done by all the stores ☐Individual Store Sales	20	Week 13			

Feature	Description	Points	Week			Milestone
Payments	-The affiliate member will be paid by the admin and it will depend upon the sales that are made by the online stores registered under the affiliated member -The affiliated members will get X percentage on the total sale on monthly basis (This percentage will be set by the admin) -The payments between the admin and the affiliated member will be carried out off the website -The affiliated member will be able to check the complete payment history that have been paid to them from the admins end as well as will be able to check the payments that they are going to receive i.e. the upcoming payments based upon the sales that a store has made which is linked to the affiliated member	15				
Respond to Admin	-Admin will have the capability to send the message to the affiliated member, thus through this section the affiliated member will have the capability to respond back to the admin -For every message received, the Affiliated Member will get notification	8				
USER ACCESS LEVEL – DELIVERY PARTNER						
Note :	**The delivery partners are the ones who will be responsible for helping the champion mall to deliver the goods to the buyers**					
Become a Delivery Partner	-Any general user on the website will have the option to become a delivery partner -They will just have to fill up a generalized form which will be submitted to the admin -Delivery Partner will also have to upload some documents which will be verified from the admin's end -Admin will review the information shared and then will decide whether to allow the user to become a delivery partner -Upon approval, the delivery partner will have access to their personalized dashboard	8				
Set Delivery Charges	-The delivery partners will then have an option to set the delivery charges for the specific locations -For the same, they will have to choose the location wherein they will be able to deliver the goods -Upon choosing the same, they will have to set the flat pricing for delivering to each of the chosen location	25				
Order Management	-The delivery partners will have ability to view all the orders that they have received on the website alongside all the order related information such as ☐Name of the customer ☐Delivery Address ☐Customer Contact Info etc. -The delivery partner will have the ability to set all the order statuses as ☐Dispatched ☐Shipped ☐Out for Delivery ☐Delivered	12	Week 14			**Milestone 9**
Payment Management	-The delivery partners will be able to see all the orders that they have in place alongside the costing for the same and also the payments that they will be receiving from the admins end minus the admin commission -The delivery partner will receive the payments from admin on weekly basis off the website Note: A buyer if chooses a particular seller, will be charged the fee set by the delivery partner plus the flat commission set by the admin	12				
Respond to Admin	-Admin will have the capability to send the message to the delivery partner, thus through this section the delivery partner will have the capability to respond back to the admin -For every message received, the delivery partner will get notification	5				
USER ACCESS LEVEL – EXCUTIVE MEMBERS						
Note :	**Executive members are the users who if registered as an executive member will get some discounts or special privileges at the partner's store**					
Become an Executive Member	-Any general user on the website will have the option to become an executive member -They will just have to fill up a generalized form which will be submitted to the admin -Also, at the same time they will need to subscribe to a membership plan that will be on a monthly basis, so that they can get discounts or other privileges -This membership plan will be recurring and will be auto renewed till the time the executive member cancels the membership	8				
Payment Management	-The executive member would be able to see the status of their membership plan i.e. active or inactive -The executive member will also be able to view the renewal date of the membership plan and will have the option to cancel it at any time -He/she will also be able to see all the transactions till date, so as to check the spending's he/she has done for the renewal of the membership plan just like transaction history	12	Week 16			
Virtual Wallet	-The executive member will have a wallet, wherein they will be able to add up money that can be used for various purposes -Say for example, the executive members go to a partner store wherein they do not accept any card payments, in that scenario the amount will be deducted from the virtual wallet of the executive member -The amount that will be paid to the partner store will be from the admins end and the amount that admin will pay to the partner store will be deducted from the wallet value -So every time there is any transaction that would take place through the wallet then the wallet virtual amount will be reduced and increased in accordance to the spending and deposit respectively -Also, the executive member will be notified for every activity with reference to their wallet	25				
Respond to Admin	-Admin will have the capability to send the message to the executive member, thus, through this section the executive member will have the capability to respond back to the admin -For every message received, the executive member will get notification	5				

USER ACCESS LEVEL – PARTNER						
Note :	- The Partners are the ones that would like to do business with the champion mall so as to become their partners wherein the executive members can go and claim their discounts - This will in return increase the sale on the physical store of the partner and executive members will get benefited with the discount that they will be getting					
Become a Partner	-Any general user on the website will have the option to become a partner -They will just have to fill up a generalized form which will be submitted to the admin -Admin will review the information shared and then will decide whether to allow the user to become a partner -Upon approval, the user will officially become a partner to the champion mall Note: 1. An executive member will go the physical location of the partner and then show their proof of being an executive member and can get discount from the partner store 2. The payments between the partners and the champion mall will be settled off the website as there will a sort of contract that will be in place 3. There won't be any specific dashboard for these users	6				
USER ACCESS LEVEL – PARTNER						
Note :	-Professional Service Providers are the ones who want to advertise their product and services but won't be selling it through the website					
Subscribe to a Membership	-Any general user on the website will have the option to advertise their services or product -They will just have to fill up a generalized form which will be submitted to the admin that will list the services and products that they will want to advertise on the website -Also, at the same time they will need to subscribe to a membership plan that will be on a monthly basis, so that they keep this advertisement seen on the website -This membership plan will be recurring and will be auto renewed till the time the user cancels the membership	20	Week 17			
Payment Management	-The user would be able to see the status of their membership plan i.e. active or inactive -The executive member will also be able to view the renewal date of the membership plan and will have the option to cancel it at any time -He/she will also be able to see all the transactions till date, so as to check the spending's he/she has done for the renewal of the membership plan just like transaction history	15				
Manage Product and Services	-The user will have an option to manage the products and services that they wish to advertise on the website -The user can advertise at max 4-5 products/services of theirs to be seen by the other buyers on the website	10				
ACCESS LEVEL: ADMIN (WEBSITE)						
Admin Dashboard	-After logging in to the system Admin will enter to its dashboard. -Through the dashboard the Admin can do the following things: ☐Manage Users ☐Commission Management ☐Product Stats ☐Report and Statics ☐Manage Payments	20				
User Management	-View Administrators -Search/ Sort Administrators -Manage Access Level of Administrators -Change status of Admin/Seller User (Active/Inactive) -Add/Delete Administrator					
Approve Seller	-This module will help Admin to sort: approve/decline the seller onto the website. -Only after Admin's approval the Seller will be displayed onto the website. -Declination of any Seller will not be able to upload product onto the website.	12	Week 18			
Verified Seller	-This module will help Admin to mark the seller as approved -Once the admin marks the seller as verified there will be verified badge appearing on the profile of the seller					
Product Category Management	-The admin will have the capability to manage all the product categories and sub categories. -The admin will be able to add, edit, or delete any category and sub category at any time. -For creating new product category, the admin will do the following things: ☐Step 1: Enter the category name. ☐Step 2: Enter description of the category if needed. ☐Step 3: Click on create button, that's it. -For creating new product sub category, the admin will do the following things: ☐Step 1: Select the category under which the admin wants to make new sub category. ☐Step 2: Enter the sub category name. ☐Step 3: Click on create button, that's it.	12				**Milestone 10**
Affiliate Member Management	-Through this section, the admin will have the capability to view the requests that will be received from users who want to become affiliate members -Admin will have the capability tp approve or decline the request -Admin will also be able to view all the affiliate members and their financial stats					

Feature	Description	Hours	Week			
Affiliate Member Commission	-We have seen above that the affiliated member will receive commission on the revenue that the website has generated through the stores registered through a specified affiliated member -Through this section the admin will have capability to set/manage the commission percentage that the affiliated member will receive on a sale	15	Week 19			
Seller Management	-The admin will have the capability to manage all the sellers that are registered on the website -Admin will have the capability to Add the seller, Delete the seller -At any point of time the admin will have the capability to deactivate the sellers account and also will have the capability to activate the same					
Executive Member Management	-The admin will have the capability to manage all the executive members that are registered on the website -Admin will have the capability to Add the executive member, Delete the executive member -At any point of time the admin will have the capability to deactivate the executive account and also will have the capability to activate the same					
Executive Member Subscription Plan management	-The admin will have the capability to set the price for the subscription plan that an executive member has to subscribed to -The admin can change the pricing for the same. This change in pricing will not affect the executive members who have already subscribed for a month but they will be charged this updated price from the next month -Also, the admin will have the capability to cancel the membership plan of any of the executive member on the website	10				
Seller Charges/Commission	-We have seen in the seller section that they will have to pay for the usage of the platform in the form of flat fee or percentage on sale or combination of both -So through this section, the admin will be able to choose how they would like to the sellers to be charged -Now, for the admin there will be a 3 options for platform charges ☐Flat Fee Only ☐Percentage On Sale ☐Both -Admin will have to choose only one of the three -If the admin ☐chooses flat fee only option then admin will have to specify the fee that he/she will charge to the seller ☐Chooses Percentage on sale then the admin will have to specify the percentage that the seller will pay on their total monthly sale ☐Chooses both then the admin will specify the flat fee charge as well as the percentage on sale for the seller Note: 1. The above charges or commission will be set differently by the admin for individual seller and the professional seller 2. Admin can change the option at any moment of time	15				
Professionals Service Providers Management	-The admin will have the capability to manage all the professional Service providers that are registered on the website -Admin will have the capability to Add them, Delete them -At any point of time the admin will have the capability to deactivate their account and also will have the capability to activate the same					
Professionals Service Providers Plan management	-The admin will have the capability to set the price for the subscription plan that these users have to subscribed to -The admin can change the pricing for the same. This change in pricing will not affect the users who have already subscribed for a month but they will be charged this updated price from the next month -Also, the admin will have the capability to cancel the membership plan of any of such user on the website	15				
Set Delivery Charges	-The admin will then have an option to set the delivery charges for the specific locations -For the same, admin will have to choose the location wherein they will be able to deliver the goods -Upon choosing the same, admin will have to set the flat pricing for delivering to each of the chosen location					
Coupon Creation	-The Admin can generate the coupons from the backend. -Each and every coupon code will be unique and will be valid for some period of time only. -Each coupon will offer some sort of discount to the clients. -To create coupons, the Admin/Seller needs to: ☐Enter the coupon code ☐Decide the discount percentage ☐Set the validity	12	Week 20			
Product Management	-The Admin will have capability to view all the products that are listed on the website. -The Admin will have the capability to manage the products i.e. able to add, edit, or delete the products at any time. -Admin will have the capability to view the products seller wise as well	10				
Order Management	-The Admin will have capability to view all the orders that are placed through the website. -Admin will have the capability to view the orders seller wise as well -Also, if the customer chooses champion mall as the delivery service, then the admin will have the option to update the order status i.e. Packed, Shipped etc.	10				
Placing Orders on behalf of Customers	-There will be some customers that want a specific a product to be delivered to their location but can see that the seller does not sell product to their location (to be specific to their country) -So in this case, the customers will contact the admin and will let him/her know about the same and the admin will place an order on behalf of such customers -In this case the admin will pay the sellers and will take the responsibility to ship the product from the seller to the customer's international address -The payments from the customers will be managed by the admin off the website -Here, in this section admin will be able to view all such requests and will place an order for the customers accordingly -But it will be completely admin's call to place an order or not	15				

Module	Description	Hours	Timeline			Milestone
Payment Management	-This will display the payments received on the website -This will keep track of all the payment transaction ☐Admin will receive a notification and the transaction will be added to its dashboard in payment section, each time the seller receives a payment or the transaction happened through the website.	15				
Rating and Review Management System	-The admin will provide the facility of rating and review for the users. -The admin will have the access to enable and disable the rating and review system for the products. Note: The user who purchase the products will have the ability to rate and review the product only the rating and review module will be available and for the particular product only which the users purchased.	8				**Final Milestone**
Contact Partners, Sellers, Executive Members	-The admin will be able to contact the sellers, partners, executive members of the website through the system itself -The admin can choose the user whom the message is to be sent and then can send the desired message -Only admin can initiate the message and the seller can respond back on the same -Upon communication the admin will have the option to close the message, so that the users cannot send the message in the room until the admin unable's the message room again	12	Week 21			
Reports & Statistics	This module will help Admin/Seller of the website to track the business growth and the sales of the products. -Excel/ CSV reports which can be easily exported and imported to or from the website. -The reports will be generated considering the following parameters: ☐Total number of views ☐Total Sales ☐Percentage conversion ☐Profit Earn ☐Per customer stats ☐Report Filter: •Highest selling products •Seller category • Product category	20				
Other Features	It includes: - Social media integration - SEO friendly - Customizable admin panel with user friendly CMS - Quick links on the home page for browsing the entire site - No Flash - HTML5 and CSS3 - W3C checked - Div based - Responsive design so it's work well on Mobile, Tablet and Desktop - Full CMS capabilities. - Content Uploading	20
